

# Values in Action: Stephanie

## **SUPER: VALUES IN ACTION**

**Stephanie, Engineer, Chevron**

Before coming to Chevron I was in the military. Chevron is an extremely military friendly company. Chevron has a very involved military network that made the transition to civilian life very easy. I was drawn to the military because of the values that are there: honesty, integrity, and duty. And those are the same reasons that I was drawn to Chevron. Every single day I am reminded why I chose Chevron, and why I want my entire career to be here.
